

# SYNTECH BLAST GUN NZ 3769

The Syntech model blast gun is a very efficient precision piece of equipment.

Like the "Zapper" blast gun the pressure and suction hose connections are located at the back to provide the operator freedom of use without becoming entangled with hose leads.

The main advantage with this particular blast gun is that it is very adaptable because the blast nozzles can be interchangeable from  $\frac{3}{16}$ " ,  $\frac{5}{16}$ " ,  $\frac{1}{2}$ "

This gun will provide trouble free operation within the life of the Tungsten Carbide Nozzle.

It is recommended that the nozzle tip must protrude beyond the face of the gun body by 4mm to effect good blasting.

Regular cleaning of the air nozzle and inner chamber of the gun body will prevent erosion of the aluminium casting by misdirected abrasive media.

This can be done on changing nozzle sizing.

**All parts shown are available ex stock at our warehouse  
12B Saunders Place, Avondale, Auckland.**

ITEM	PART NO	DESCRIPTION
1	NZ1142A	GUN BODY
2	BCS4759A	AIR NOZZLE HOLDER
3	NZ1144	SET SCREW
5	NZ1143A	BLAST NOZZLE HOLDER
6	BCS5652	'O' RING
7	BCS5653	BLAST HOSE ADAPTOR
8	BCS5654	AIR HOSE TEAT
5A	NZ89141	SET SCREW
9	NZ6614	SPRING WASHER
10	NZ1145	FLAT WASHER
11	BCS1571-3	AIR NOZZLE $\frac{3}{16}$ "
12	NZ1774-3	BLAST NOZZLE
